### *Allowable Subject Matter*

2. Claims 1-6 and 8-16 are allowed.
3. The following is an examiner's statement of reasons for allowance:

In re claim 1, the primary reason for the allowance of the claim is the following patentably distinct limitations that are not taught or suggested by the prior art of record: a connection region of the drain of the semiconductor element borders on the bottom plate and forms a drain connection that projects from the envelope, and wherein the connection regions of a source and a gate of the semiconductor element are situated on a side of the semiconductor element opposite the connection region of the drain.

In re claim 8, the primary reason for the allowance of the claim is the following patentably distinct limitations that are not taught or suggested by the prior art of record: the assembly of conductors and the bottom plate are formed from two conductor frames, one of which comprises the bottom plate and a conductor, and the other one of which comprises another conductor, and after securing the semiconductor element to the bottom plate in one conductor frame, the other conductor frame is secured to the semiconductor element.

In re claim 11, the primary reason for the allowance of the claim is the following patentably distinct limitations that are not taught or suggested by the prior art of record: a further
